

Covid Risk Management

A Survey, Communication and Reporting Platform

- Simplifies the process of checking in daily with every employee, other staff or visitor to assess for Covid risk or exposure.
- Fully integrated text message communication channel, and robust reporting capabilities to identify and follow up on risk.
- Full compliance with all CDC and local Department of Health regulations.

CORE FEATURES

Everything You Need Within a Single Platform

- Create customized assessment surveys that can be completed via mobile device.
- Email or text messaging to distribute assessment reminders and instructions to anyone that indicates they may be at risk.
- Admin access to real time dashboard and reporting from any device.
- Real time alerts and notifications to key staff as soon as an individual completes an assessment and indicates they are at risk.
- Send one time text messages to everyone when there is an urgent communication that needs to be sent out and seen right away.

TRACK EMPLOYEES & ASSOCIATED GROUPS

A Complete Employee Profile

- Group and track employees or other staff by department, location or event participation.
- View assessment completion and risk history for each employee along with any follow up details.
- Track vaccination status, positive antibody test results, and other information so that lower risk students and groups are easily identified in application*.

*This feature will be available on 12/15

AN EFFICIENT, COMPLIANT PROCESS

Real Time Dashboard and Reporting

- “At a glance” dashboard allows your leadership team to quickly understand where your entire organization stands with all things COVID-19 risk related.
- Easily pull standard reports, create custom reports that can be emailed, printed or exported to Excel.
- Eliminate the inefficiency of paper, excel spreadsheets and emails when compliance or adherence with local, state or federal agencies is required.

A COMPLETE COMMUNICATION PLATFORM

Real Time Alerts and Notifications

- Text message or email alerts to HR, Managers, Supervisors, or any other key staff when an individual is at risk.
- Communicate safety instructions or protocols to at risk employees or staff as soon as an at risk assessment is submitted.
- Streamline communication when risk or an outbreak is identified by creating and sending one time text messages to impacted groups.
